WHY SQUAIR?

"Square" because our methodology, our advice, and our client relationship are "square and fair". We also wanted to instil some "air", in reference to the freedom and independence of our partners, and the flexibility of the firm. By assembling both words, we express what brings us together and constitutes our DNA.

A NEW MODEL FOR A BETTER SUPPORT

Digital technology has profoundly impacted our lifestyle and working methods. In just a few years, SMEs as well as major international groups have seen their model transform. Nowadays, being efficient is not enough, one also has to be proactive and flexible. How is it possible to deliver the best legal expertise without integrating these paradigm shifts?

We created Squair to answer this question... a new model law firm offering a fresh perspective and an innovative alternative to the traditional lawyer/client relationship. Squair embraces the freedom and independence of a non-hierarchical structure to deliver quality, high value advice.

Flexible and bespoke support

Squair is a business law firm with a modern organisation, aggregating intelligence to deliver the right analysis and most judicious advice at a fair price.

Facing new forms of mobility and an ultra-connected world, we wanted to bring next level advice to our clients. In order to achieve this goal, we had to wipe out the traditional operating system, reinvent the lawyer/client relation, and assemble a team of free-thinking and autonomous lawyers with complementary expertise.

FLEXIBILITY

Squair's light and non-hierarchical structure allows lawyers to take more joy in their work. Combining the spirit and flexibility of start-ups with the power of resources deployed by large law firms is at the core of our unique DNA. Flexibility and freedom is a priority in order to provide only the best to our clients. By using the latest technologies and embracing flexible work methods we can ensure to meet your expectations in an efficient and accurate manner, wherever you are.

HIGHEST OPERATIONAL STANDARDS

Our lawyers have access to the best tools and resources, enabling them to deliver efficient, precise, top notch advice. After performing a thorough analysis of the situation and risk assessment, our lean team crafts the best solution for your situation at the right price. Above all, we devote our expertise and high operational standards to the success of your projects.

“SQUAIR'S MODEL IS NOT BASED ON A PYRAMID STRUCTURE, GIVING CLIENTS THE ASSURANCE THAT THEIR MATTER IS DEALT WITH BY AN EXPERIENCED LAWYER WITH BOTH THE EXPERTISE AND THE INSIGHT REQUIRED TO PROVIDE THE BEST ADVICE.”
